

Clench your teeth tight until it hardens, okay?

GRIT

I'll go do some preparations for dinner.

The dentures I made for Reszurre before were getting a little loose, so I swapped them out for new ones. If I want her to be able to return to her homeplace after regaining her memories, I should probably take regular care of her mouth.

How are the dentures? Not shaky or anything?

No... They seem to be fine...

NOM... NOM...

Though Reszurre doesn't have full control of her hand yet, she can at least move her arm with a bit of help, so I let her eat by herself as practice. It definitely wasn't easy, but she seemed happy to be able to carry the food to her mouth on her own.

Yes! ...Err... May I...
...? ...Oh!

Do you want more?

Yes!

Mr. Apothecary, what's in these...?

It's fish paste. Do you like it?

BLUSH...
